DETAILED ACTION

Page 2

Election/Restrictions

1. Applicant's election without traverse of Group II, claims 1-11 filed 4/18/05 is acknowledged.

Claims 12-15 have been withdrawn from consideration as being directed to non-elected invention.

Information Disclosure Statement

2. The Information disclosure Statement filed on 5/23/05 has been received by USPTO but has not been scanned. Thus, the Examiner will consider the IDS as it is scanned.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

21(2) of such treaty in the English language.

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

 (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article
- 4. Claims 1-4 and 7-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Lin et al. (6,806,192) as evidenced by Yang et al. (6,524,867).

The figures and reference numbers referred to in this office action are used merely to indicate an example of a specific teaching and are not to be taken as limiting.

Application/Control Number: 10/748,106

Art Unit: 2891

Regarding claims 1-4 and 7-8, Lin et al. disclose (see specifically figures 1-7) a method comprising: forming a barrier layer (18) (e.g., of tantalum, Col. 4, lines 19-24) on a substrate (10) including a dielectric layer (12-14-16) and a contact opening (25), wherein the contact opening comprises a via through the dielectric layer (12-14-16) to a contact point (20) (Fig. 1-2); depositing a conductive material (26) in the contact opening to form a interconnect (Fig. 6); removing the conductive material sufficient to expose the barrier layer (18) on the substrate surface (Fig. 7); oxidizing the material of the barrier layer (18) to create an oxidized surface highlighted as layer (19) (Fig. 3). Since barrier layer (18) has been oxidized, the electrical conductivity of such barrier layer is inherently reduced as evidenced by Yang et al., Col. 1, lines 45-50.

Page 3

Allowable Subject Matter

- 5. Claims 5-6 and 9-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 6. The following is a statement of reasons for the indication of allowable subject matter:

The prior art taken either singly or in combination fails to anticipate or fairly suggest the steps of electroplating, removing a portion of the conductive material in the contact opening, and electroless plating selectively for the conductive material, as recited in claim 5 and 9, and these method steps could not easily be conceived of even by a person skilled in the art in the light of features disclosed in the cited art (e.g., Lin et al).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Luan Thai whose telephone number is 571-272-1935. The examiner can normally be reached on 6:30 AM - 5:00 PM, Monday to Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bradley W. Baumeister can be reached on 571-272-1722. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
